МАТЕМАТИЧЕСКИЙ СБОРНИК
Том 110(152)(1979), вв. 1–4
MATHEMATICS OF THE USSR-SBORNIK
Volume 38, Numbers 1–4, 1981

AUTHOR INDEX

Amangil'din, T. G. See Murtazin, H. H.

Andriičuk, V. I. *On elliptic curves over pseudolocal fields* 83

Arsen'ev, A. A. *On statistical solutions of the Navier-Stokes system of equations* 31

Avetisjan, R. A. *On sets of absolute convergence* 245

Bagirov, L. A. *A priori estimates, existence theorems, and the behavior at infinity of solutions of quasielliptic equations in* $\mathbf{R}^n$ 437

Belonosov, V. S. *Estimates of solutions of parabolic systems in weighted Hölder classes and some of their applications* 151

Danilov, V. G. and Le Vu An', *On Fourier integral operators* 293

Dubinskiĭ, Ju. A. *Limits of Banach spaces. Imbedding theorems. Applications to Sobolev spaces of infinite order* 395

Evdokimov, S. A. *Analytic properties of Euler products for congruence-subgroups of* $\mathrm{Sp}_2(\mathbf{Z})$ 335

Feigin, V. I. *The asymptotic distribution of eigenvalues and a formula of Bohr-Sommerfeld type* 61

Fomenko, V. T. *Continuous bendings of convex surfaces with boundary conditions* 453

Fomin, G. A. *On convergence in the mean of Fourier series* 231

Gorlov, V. V. *A sufficient condition for closed classes of k-valued logic to have only trivial congruences* 507

Gulin, A. V. *Theorems on the stability of nonselfadjoint difference schemes* 271

Ivanov, A. F. *On a homological characterization of a certain class of local rings* 421

Ivanov, L. A. See Kiprijanov, I. A.

Jančevskiĭ, V. I. *Reduced unitary K-theory. Applications to algebraic groups* 533

Kaljagin, V. A. *On a class of polynomials defined by two orthogonality relations* 563

Kazarin, L. S. *On the product of two groups that are close to being nilpotent* 47

Kiprijanov, I. A. and Ivanov, L. A. *On lacunae for some classes of equations with singularities* 217

Kostrikin, A. I. *Sandwiches in Lie algebras* 1

Le Vu An'. See Danilov, V. G.

Lisagor, L. R. *The Banach-Mazur game* 201

Lopes, G. [Guillermo López L.]. See Vavilov, V. V.

Lukašenko, T. P. *On majorants of D-integrable functions* 407

Mel'nikov, A. V. *On the theory of stochastic equations in components of semimartingales* 381

Murtazin, H. H. and Amangil'din, T. G. *The asymptotic expansion of the spectrum of a Sturm-Liouville operator* 127

Novikov, A. A. *On estimates and the asymptotic behavior of nonexit probabilities of a Wiener process to a moving boundary* 495

Panasenko, G. P. *Higher order asymptotics of solutions of problems on the contact of periodic structures* 465

Prohorov, V. A. See Vavilov, V. V.

Ratinov, V. A. *The structure of semiperfect rings with commutative Jacobson radical* 427

Repnickiĭ, V. B. *Arithmetical modules* 143

Saakjan, A. A. *Integral moduli of smoothness and the Fourier coefficients of the composition of functions* 549

Šeremeta, M. N. *Analogues of Wiman's theorem for Dirichlet series* 95

Temljakov, V. N. *On the question of the asymptotic behavior of best approximations of continuous functions* 365

Turaev, V. G. *The fundamental groups of manifolds and Poincaré complexes* 255

Uglanov, A. V. *Surface integrals in a Banach space* 175

Ul'janov, P. L. *On Fourier coefficients* 11

Vavilov, V. V., Lopes, G. [Guillermo López L.] and Prohorov, V. A. *On an inverse problem for the rows of a Padé table* 109

Volovikov, A. Ju. *Two theorems from the theory of periodic transformations* 119

Žikov, V. V. *A point stabilization criterion for second order parabolic equations with almost periodic coefficients* 279
